The Nintendo 64 Controller

Control Stick Function

The Nintendo 64 Control Stick uses an analog system to read the angles and directions of its movement. This allows precision control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from its neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it. If you need assistance, contact Nintendo Consumer Assistance at 1-800-255-3700 or your nearest Nintendo Authorized Repair Center.™

Holding The Nintendo 64 Controller

While playing Wave Race 64, we recommend you use the hand positions shown at right.

By holding the controller like this, you can operate the Control Stick freely with your left thumb. Using your right thumb, you can easily access the A, B or C Buttons. Use your left index finger to operate the Z Button on the back of the controller and your right index finger to operate the R Button on the top.

Connecting the Nintendo 64 Controller

To play any of the one player game modes, you can connect a controller to any of the controller sockets located on the front panel of the Control Deck. For two player games, connect a second controller to any other socket. Player 1 will use the controller connected to the lowest number socket. To change the connection during a game, switch the POWER to OFF, make any controller connection changes, then return the POWER to ON to resume play.

**** You must use two controllers to play the 2 Player VS. Mode.***

1. Before Starting the Game

Correctly insert the Game Pak into the Nintendo 64 Control Deck and move the Power switch to the ON position. Make sure not to touch the Control Stick at this time. When the demo begins, press START to display the title screen. Press START again to display the Game Mode menu.

Championship

You will race your JET SKI watercraft against three computer controlled opponents in a series of races in different locales.

Time Trials

In the Time Trials mode, you will race a course solo in an attempt to get the best time.

Stunt Mode

Your goal is to earn as many points as possible in one lap. This mode is run solo as well.

2P VS.

Raced on a split screen, this mode is a head-to-head match for two players.

OPTIONS

You can change settings or see the records for each game mode.

*** When the Watercraft Select screen appears, press the B Button to return to the previous screen.**

Watercraft Select

On the Watercraft Select screen, a player can choose a JET SKI watercraft that matches his technique or preference from the four available. Select by pressing **➤** or **◀** with the Control Stick and confirm with the A Button.

Watercraft Setting

Each JET SKI watercraft is set to NORMAL as a default. If you would like to keep this as is, press the A Button while the NORMAL button flashes. If you want to make an adjustment, push the Control Stick **➤** so that the CUSTOM button flashes, then press the A Button. You will adjust three elements: Handling, Engine and Grip. Press the Control Stick **◀** or **➤** to make your adjustments and press the A Button to enter.

Light

Turn easily by pushing the Control Stick a small amount.

Handling

This controls how the JET SKI watercraft will turn and is dependent upon how far off center the Control Stick is pressed.

Heavy

Turning will require you to press the Control Stick far off center.

Dash

Accelerate quickly — enables quick starts.

Engine

This determines how fast the engine comes up to its maximum speed.

Top End

Accelerate slowly — enables a higher maximum speed.

Loose

Overall speed will be increased, but you are more likely to slip when turning.

Grip

Water resistance.

Tight

Overall speed will decrease, but you are less likely to slip.

• Each JET SKI watercraft's basic performance differs, so even when customized identically, they will not necessarily have the same operational abilities.

• Your custom data is saved to Game Pak memory.

3. Game Modes

Championship

The Championship is a multi-race circuit between four fierce competitors, each one trying to earn the most points. After completing the entire circuit, the overall winner will be determined by totaling all of the points earned. Whenever a record time occurs, it will be recorded into Game Pak memory.

Difficulty Level

There are three levels of difficulty. At first, you can only select NORMAL. If you clear the Final Course, you will be able to select the next difficulty level. As the difficulty level increases, your opponent's speed will increase as will the number of obstacles on the course.

- Normal A 6-course circuit
- Hard A 7-course circuit
- Expert An 8-course circuit

Warming Up

When you select the NORMAL level, you can warm up on the practice course, Dolphin Park, before you begin the circuit. After you become accustomed to operating your JET SKI watercraft, press START to pause the game. When the menu appears, select START THE RACE to go to the first race.

Course Introduction screen

Course Layout

You need to finish with at least the rank displayed to advance to the next round. If you have acquired enough points to go on, even if you receive a disqualification (0 Points), the display will be blanked.

● Rules

Start Position

This will change depending on the finishing order of the previous race. The character that came in first place will start from the pole position. In the first race, the player always starts last.

The Number Of Laps

Each race is three laps in length. Using the Option mode, you can change this to four or more laps.

Route Buoy

Red and yellow buoys mark the race course. Make sure to pass to the right of a red buoy, and left of a yellow buoy.

Engine Power

If you pass a buoy correctly, your engine's power will increase by one level, and your JET SKI watercraft's speed will increase. Your engine power can increase to a maximum level of five.

Miss

If you do not pass a buoy correctly, it counts as a Miss. When you Miss, your engine power will return to level zero. Should you Miss five times in a race, you will be disqualified from that race.

Course Out

If you go outside the pink buoys that surround the course perimeter, the Course Out counter will begin. Unless you return to the course within five counts, you will be retired.

●Screen Display

**Finishing Position
For Advancement**

Elapsed Time

Speed

Rank

Lap Number

Lap Time

The best lap time will be displayed in red.

Number Of Misses

Each time you Miss, an X mark will be made on the markers

Opponent Indicator

This indicates the position of the opponent closest behind you.

Power Meter

This is the engine power level. When you reach level five, MAX POWER will be displayed.

Order

This is the current order of the four racers. As the rankings change, this display changes as well. The player is displayed in the red panel. When the opponent immediately behind you passes the Start/Finish gate, the difference between their time and yours will be displayed. While in the water, any players who have fallen overboard will disappear from their panels.

When you are close to leaving the course, a red arrow will appear to guide you back.

When you pass the Start/Finish gate, the time difference between you and an opponent leading you will be displayed. If you are in the lead, this will not appear.

●Point and Round Clear

Based on the finishing order, each rider is awarded points.

First place	7 points
Second place	4 points
Third place	2 points
Fourth place	1 point
Retire	0 points

** In the event of a tie at the end of the circuit, the rider who passed the Start/Finish gate first in the final race will be awarded the championship.*

After each race in a circuit, should your total points be insufficient, you will not advance to the next race and the game will be over. The condition for advancing is different depending on the difficulty level you have selected.

CIRCUIT RANKING		
RANK	RIDER	POINTS
1	A. SYTHARY RIDE 1: 1:01	23
2	M. JATA RIDE 1: 1:04	13
3	D. MARINEA RIDE 1: 1:10	10
4	K. HAYAMI RIDE 1: 1:15	7
POINTS NEEDED TO ADVANCE		

Points Needed To Advance

	Normal	Hard	Expert
The 1st round	1	2	2
The 2nd round	2	4	4
The 3rd round	4	6	8
The 4th round	8	10	12
The 5th round	12	14	16
The 6th round	16	21	23
The 7th round		28	30
The 8th round			37

Example:

To go to the 4th round when the Normal level is selected, you need to have a total of 4 points at the end of the 3rd round.

●Pause Screen

If you press START during the Championship mode, the game will pause and a menu with four choices will appear.

- **Continue** — Restart current game
- **Retire** — Quit the race. You receive zero points
- **Start From Beginning** — Restart the circuit, same JET SKI watercraft same difficulty
- **Quit The Game** — Quit this mode and return to the title screen

Time Trials

Race your JET SKI watercraft against the best time and the best lap records. You race the same courses as in Championship mode. Try different settings to improve your best record, even if it is only 1/1,000 second faster.

•Course Select and Difficulty Level

You can select any course that you have reached in the Championship mode. (Dolphin Park is not available in this mode.) There are three different difficulty levels. Until you advance to the HARD and EXPERT levels in the Championship mode, you cannot select those levels.

Rules and Screen Display

The basic rules are the same as in the Championship mode. When you pass the Start/Finish gate, the time difference between the current lap and your best time will be displayed. When you pause the game in Time Trials, five menu choices will appear on the screen:

Continue — Restart the current game

Restart — Restart from the beginning.

Watercraft Select — Restart from the Watercraft Selection and Setting screen

Course Select — Change a course.

Quit The Game — Quit this mode and return to the title screen

•Initials Entry

Should you make a record, you can enter your initials. Select each letter using the Control Stick. Enter up to three letters with the A Button. Use the B Button to cancel an entry.

•Results Screen

After you reach the Start/Finish gate, the top three times and best lap are displayed on screen. (The best times from the Championship mode are included in this list.)

When a record is made with the Normal setting, an "N" will be displayed next to the picture of the JET SKI watercraft. With custom settings, a "C" will appear. If you want to continue to challenge Time Trials, select RETRY when the menu appears.

Stunt Mode

In this mode, instead of competing for speed, you are competing for points. Steady control and acrobatic techniques are required to excel. In Stunt Mode, the key to the highest scores also lies in choreographing your stunt routine. By determining in advance which acrobatic technique to use and when, you will be more successful than if you just ride around doing a few tricks.

● Course Select

You can select from the nine courses, including Dolphin Park. Like Time Trials, you cannot select a course that you have not reached in the Championship mode. The courses are the same as Championship mode, but the types and locations of obstacles differ.

● Rules

Check Point and Time Limit

Check Points separate each course into four sections. You have to pass each Check Point within the time limit, scoring as many points as possible. You must pass through the gate to clear the Check Point, otherwise your time will not be extended. You will be disqualified for exceeding the time limit and your game will be over.

Scoring System

Time Score

The time remaining when you pass each Check Point is calculated into your score. Each tenth of a second equals five points.

Ring Score

When you go through a ring on the course, you receive 50 points. Each ring that you pass through consecutively following that will increase the points you receive by an additional 50 points. If you miss a ring, scoring begins at 50 points again.

Stunt Score

If you input a key command (special controls using the Control Stick) while racing, the rider will do acrobatic moves. You earn different scores with different acrobatic stunts and the accuracy of your performance.

In this example, 6.5 seconds remain. (65 x 5 = 325 Points!)

●Acrobatic Moves

(For details, consult the accompanying WAVE RACE 64 Operation Card.)

Flip (Vertical spin in the air)

Using a ramp, you can do a flip. The amount of time you are in the air is calculated as points. When you successfully land, you receive 100% of the points. Miss slightly, (e.g. your legs are out of position), and you get 50%.

Barrel Roll

You will make a slow horizontal spin in the air. The amount of time in the air needed is longer than for a Flip, so you will need to jump higher to be successful.

Handstand

Do a handstand on top of the JET SKI watercraft. You can still steer slightly as you do this. The longer you hold a move, the higher the number of points you will earn. This point is common to the following acrobatics as well.

Backwards

Rotate your body 180 degree and ride the JET SKI watercraft backwards.

Standing

As you twist your body, you will ride on the front of the JET SKI watercraft in a standing position.

Somersault

From the Standing position, you can do a somersault and return to the normal racing position. Doing this will add bonus points to the points received for Standing.

Advice for achieving a high score

- Try to pass all the rings. If you miss even one, it could greatly affect the score.
- With Handstand, Backwards and Standing, if you do the same moves several times within a Check Point, you will not get as many points after the second try. To avoid this, do not repeat the same tricks. Instead try a variety of acrobatic moves.
- Make sure to have enough speed before running up a ramp, so that you can do your trick and still jump successfully.
